Unplayable, broken garbage. Crashes at random points on SteamOS/Linux without warning....levels unlock in a random order...game sometimes decides you've passed the level and gives you the achievement for "minimum number of portals" despite not clicking a single time...

And the physics are HORRIBLE. It's like trying to play a third-person Portal where everything including yourself is made out of jelly.. Pretty good portal-like 2d game. Has some pretty hard levels in it, overall graphics style is really nice.

In-game music isn't exactly my thing, but that's more of a personal preference.

Definitely suitable for children and grown-ups alike.. The idea of this game is nice, but the physics and gameplay is quite bad (at least on Linux). The pod reaches infinite speed upon bouncing a few times against some rocks and can disappear off screen.

This renders the game unplayable.. (short) Very. Nice.. I really like the game, it's like a portal 2D V Om, very simple and addictive. Also, I really enjoyed minimalistic interface, you can start playing without reading any single word, so awesome, I hate long boring tutorials.. Fun; cheap; short. I'm kinda stuck on the last level, oh well.. An clever and amusing take on the portal theme. My only complaint is that it is a bit short (only a couple dozen levels) and none terribly challenging.

I got it on sale, and for the price it was worth a couple hours of amusement.. Lots of fun, some levels are pretty difficult, but my favorite feature so far is the global leaderboard!. Very fun, but very short. I was able to complete it in less than 2 hours, but I also simply could not stop playing. Hoping for another one, or some DLC maybe. If you like 2d gravity/physics based puzzle games (bonus if you like Portal), it's definitely worth checking out. I would just recommend getting it when it's on sale.

Imagine "Cut the Rope" and "Portal" have a baby!
